

Complete User Setup Instructions for IhrHub with PostgreSQL

0. Clone the Repository

Open your terminal and run:

```
git clone https://github.com/Fiti-git/FI-IHR-B.git
cd FI-IHR-B
```

1. Install Python

- Download & install Python 3.8+ from python.org
 - Make sure to add Python to your PATH during installation
-

2. Install PostgreSQL

- Download PostgreSQL from postgresql.org
 - Install with default settings
 - Set the PostgreSQL password during setup (for user postgres)
 - Confirm PostgreSQL service is running
-

3. Create Database

Open psql shell or pgAdmin and run:

```
CREATE DATABASE "IHRDB";
CREATE USER postgres WITH PASSWORD 'postgres';
GRANT ALL PRIVILEGES ON DATABASE "IHRDB" TO postgres;
```

4. Set Up Python Virtual Environment

```
python -m venv venv
.\venv\Scripts\activate # Windows
# source venv/bin/activate # Mac/Linux
```

5. Install Dependencies

```
pip install -r requirements.txt
```

6. Apply Migrations

```
python manage.py migrate
```

7. Create Admin User

```
python manage.py createsuperuser
```

8. Run the Server

```
python manage.py runserver
```
